

WorldBuilding Pad

My world is set in another dimension with magic and steampunk elements, but where magic is only used and sometimes abused by politicians, so that there are always violent problems, such as riots or even revolutions. We accompany the heroine Sophie Winter and her servant Charlie as they try to win against the others in a world immersed in political power struggles, as the Democratic Party tries to use magic to find an old, sunken ruined city where it is said that all the world's knowledge is stored.
